WHY KIRANSHREE ELECTRICALS?

Safety First

We engage safety consultants to oversee the safety aspects by way of spot inspections to check if the guidelines are followed.

Quality Control

We generate quality control reports for shop drawings, items procured from the market, working methods, or the communication system.

Project Planning

The Project management team works on the time schedules, procurement schedules, and the manpower needs.

Zero Waste

The site management team takes Inputs from the design team and the project management team and prepares for the execution.

"We at Kiranshree Electricals believe that feed- back based on interaction guides improvement. We are constantly in touch with the end-users. / clients for the feedback and quality which needs improvement.

We also encourage our associates for feedback from Architects /Project Management Consultants/Builders/suppliers and subcontractors and also our own team members. The purpose is to bring our best efforts to improve the quality by way of constant interaction."

OUR MISSION

We at Kiranshree Electricals believe that feedback based on interaction guides improvement. We encourage our associates for feedbacks on what they feel needs improvement, whether it is our Client or Architect or Project Management Consultants, Builder, supplier or subcontractor, or our own team. The purpose is to bring our best efforts to improve, by way of constant interaction.

OUR VISION

The team believes that contracting firm is a service industry. The methods and practices adopted to meet the goals are developed After a very critical study of responses from Architects, Designers, Consultants, Suppliers and end users for years together in different capacities namely as designers, Project and facility managers and contractors.

The background image shows two men in hard hats and work shirts shaking hands. They are silhouetted against a bright sky with power lines and towers in the background. The man on the left is wearing a red hard hat, and the man on the right is wearing a blue hard hat. They are both wearing dark, long-sleeved shirts. The background features several high-voltage power line towers and a clear blue sky with some light clouds. The sun is visible, creating a strong backlight effect on the workers.

OUR GOAL

We are glad to have an associated Electrical Panel Fabrication unit with well experience skilled technical team that manufactures all kinds of Electrical power and control panels. Today we are offering a wide range of solutions to our valued customers to meet their requirements.

We have associated manufacturing unit for all types of power panels and Distribution Boards and control panels some of are mentioned below.

TECHNICAL TEAM

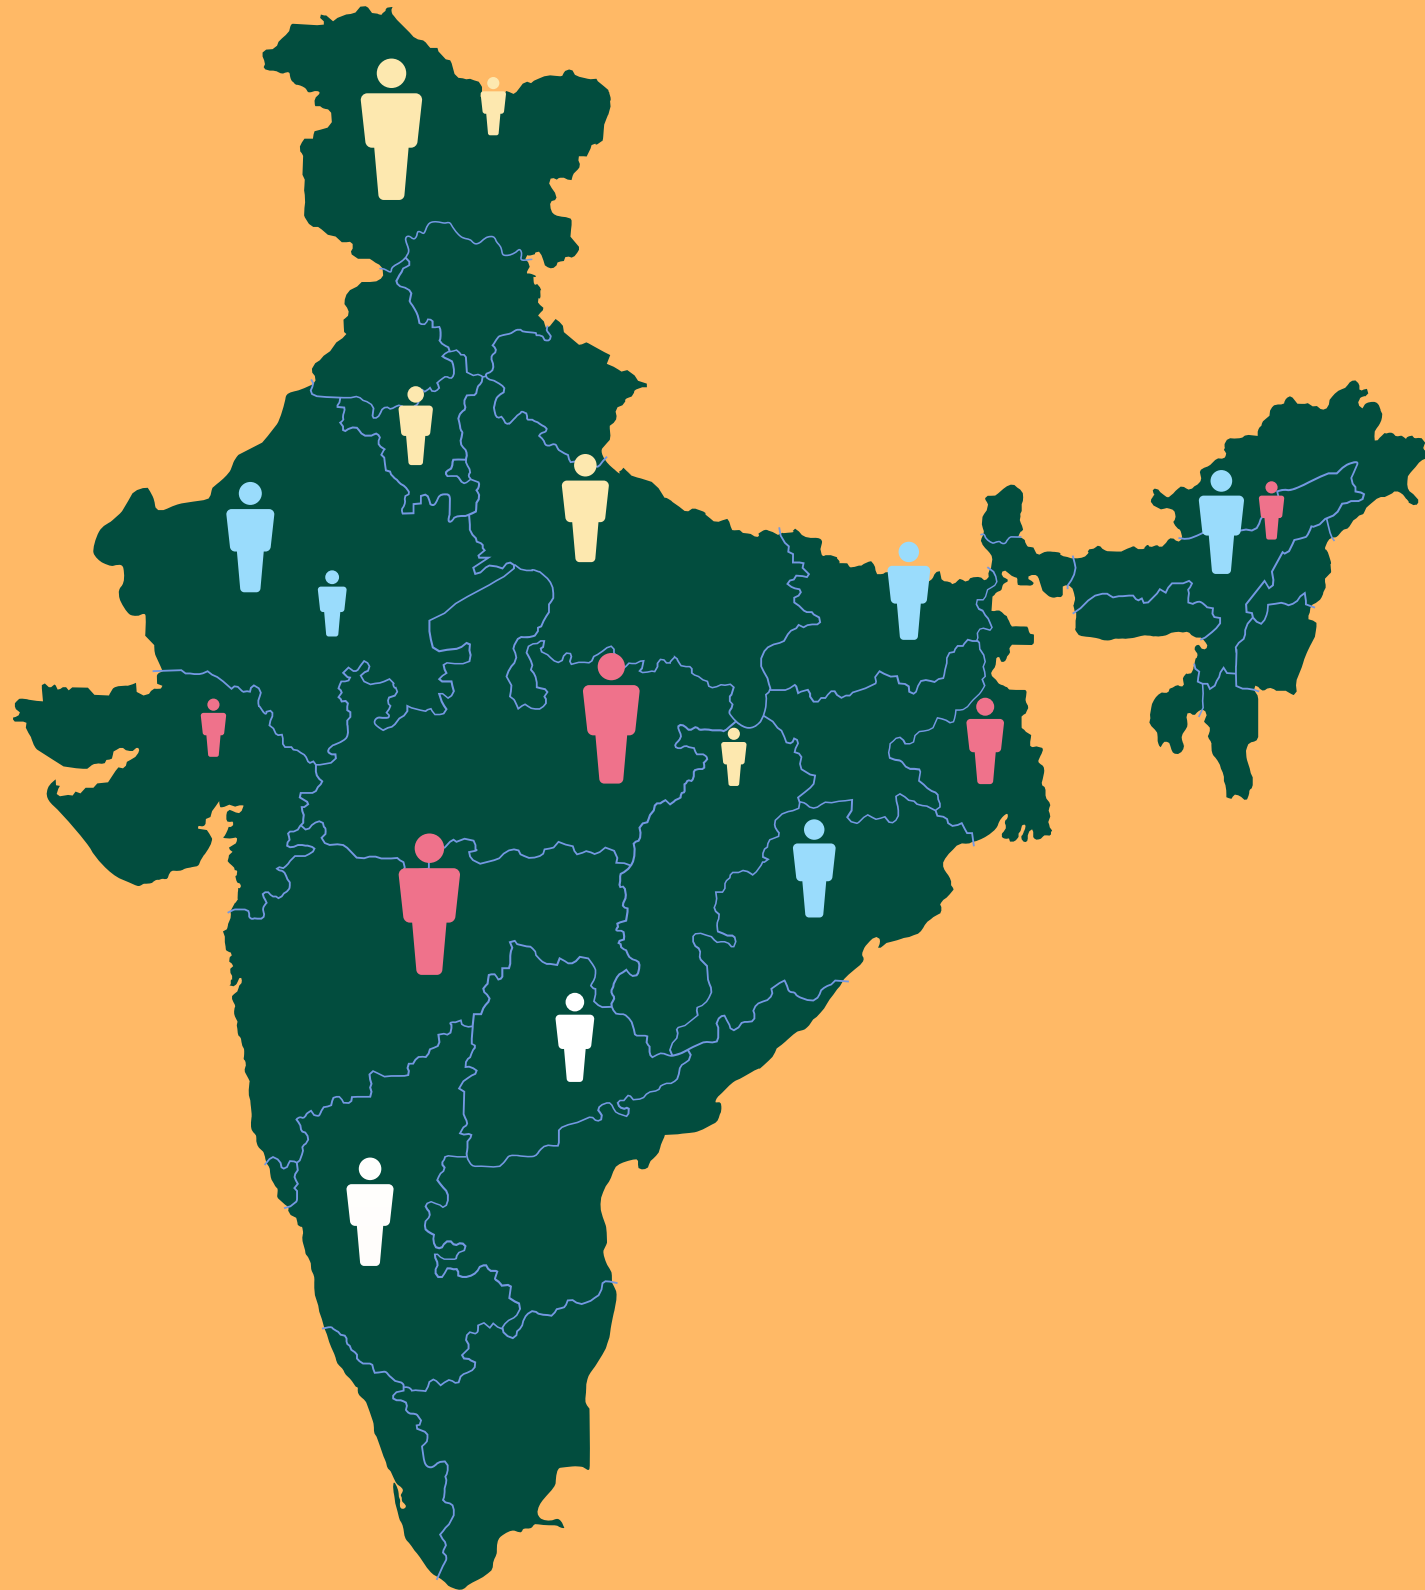

The organization is supported by a competent supervisory team of about 8 engineers and can mobilize a workforce of 100-200 at any given time. This is in addition to the design team and administrative staff. The organization is young, but the team involved is experienced and dynamic. The aspirations of the team are genuine. Each individual has proved his capabilities independently. The association is to ensure a strong management team to evolve and implement methods and processes to match the emerging International & Indian standards.

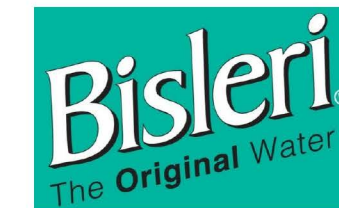

The organization has competent workforce for Sales and marketing, design, project management, procurement, site management and after sales service.
